*Luxor presents...*

## **Our own wood door collection**

*These doors are available in the ever-popular Oak, Maple, Cherry and White birch wood species. Matching mouldings and accessories as well as finished ends are also offered. This generous offering of door styles can be ordered in most of our spray stain finishes (refer to spec book). Deluxe finishes are available as well as our normal glazed and speckled finishes. Standard top coat is applied on all finishes but optional sheens are also available for a nominal fee. All of the Luxor wood doors are finished with a very durable conversion varnish topcoat that is extremely resistant to water and soap damage !*

*It is impossible to match the colors and door styles shown in this catalogue with our cabinet stain colors and styles, therefore, you must view the actual door samples when making your selection.*

*Because every tree is different, wood of the same species will vary and will accept stain colors differently. Variations in grain and color are considered acceptable even desirable and are not considered reason for replacement.*

*These beautiful finishes are inspired by an authentic handcrafted design, therefore, inconsistencies and variations are part of their beauty and authenticity. The amount and consistency of the "glazing" will vary greatly from one wood species to another and from one door style to another. All selections need to be made from an actual door sample of the selected glazed finish. However, variations will also appear from door to door within the same style and wood species.*

*Door and product availability may vary slightly from those shown in this brochure due to material availability and/or improvements to our designs. Specifications are subject to change without notice. Check with your dealer for product specifications before planning your kitchen.*
